

the icon on the top left will be fund icon when we make one but in the on boarding phase it will be changing if the his under validation from a capital side it show as the check list icon

once he is active on the first login it will show this thumbs up with a dynamic coloring like purple like button once pressed then it changes to be the fund icon and stops like this

we could have a dormant icon if he stopped using the app for a while

the full tx history will also show the tx list then each tx could be pressed and it will show the details of the tx (amount, fees, date & time and... channel that the tx was made from and the account no/whether it is a mobile wallet or bank account or instapay account name)
